

LaunchLens

AI market research that tells you **Go,**
Niche, or No-Go in seconds

POWERED BY LANGGRAPH + OPENAI

THE PROBLEM

Founders fly blind when validating product ideas

- Manual research takes **40+ hours** per idea
- **42% of startups** fail due to no market need
- Research is scattered across **5+ tools** with no synthesis

A FOUNDER'S TYPICAL PROCESS

- ✗ ~~Google Trends tab open~~
- ✗ ~~Amazon results browser~~
- ✗ ~~News articles to skim~~
- ✗ ~~Spreadsheet with guesses~~

Still no clear answer

THE SOLUTION

LaunchLens researches any product idea automatically —
so you can focus on building

"Can I launch eco-friendly lunch boxes in India?"

GO • High Confidence

A LangGraph agent fans out to three data sources simultaneously

THE VERDICT

Every session ends with a structured, evidence-backed decision

Not a summary. Not raw data.
A clear **GO, NICHE, or NO-GO**
with reasoning and confidence.

Query: "eco-friendly lunch boxes in India"

✓ **GO**

High Confidence

Strong demand signal on Google Trends, multiple Amazon competitors with healthy ratings, and supportive news coverage confirm a growing market with room for a differentiated entry.

KEY FACTORS

- ↑ Google Trends avg. interest 72/100 over 12 months
- ↑ Amazon.in shows 40+ listings, avg. ★4.2
- ↑ 18 recent news articles signal rising consumer adoption

Production-grade AI infrastructure — not a weekend prototype
